

PIERPLAS

Floating Platforms

CONNECTING YOU TO THE MARINE WORLD

TECHNOLOGY

Modular system, consisting of blocks and plastic components that allow the floating platforms to be assembled in the most diverse formats and dimensions. However you desire.

QUALITY

Made of High-Density Polyethylene (HDPE), high resistance plastic, it has antistatic and anti-UV properties. Long-lasting material with a service life of over 20 years of use. Precise and high definition finish.

EFFICIENCY

Quick assembly with very little maintenance required. Product is easy to install, move and transport. Unique and aesthetically pleasing design. Ensures greater comfort and stability on water.

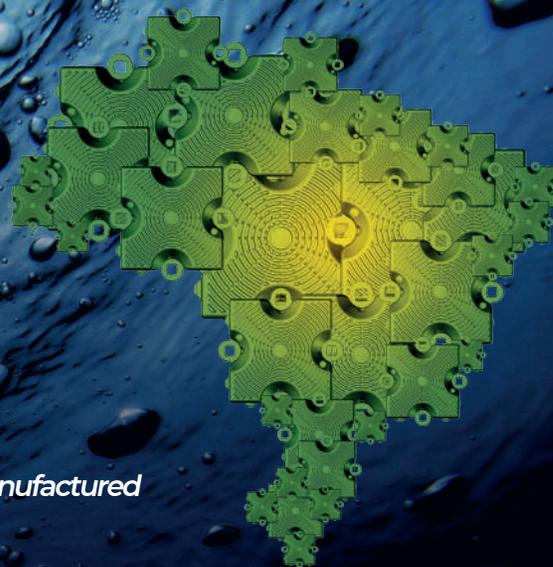

A SOLUTION THAT ACCOMPANIES THE CHANGE IN WATER LEVEL

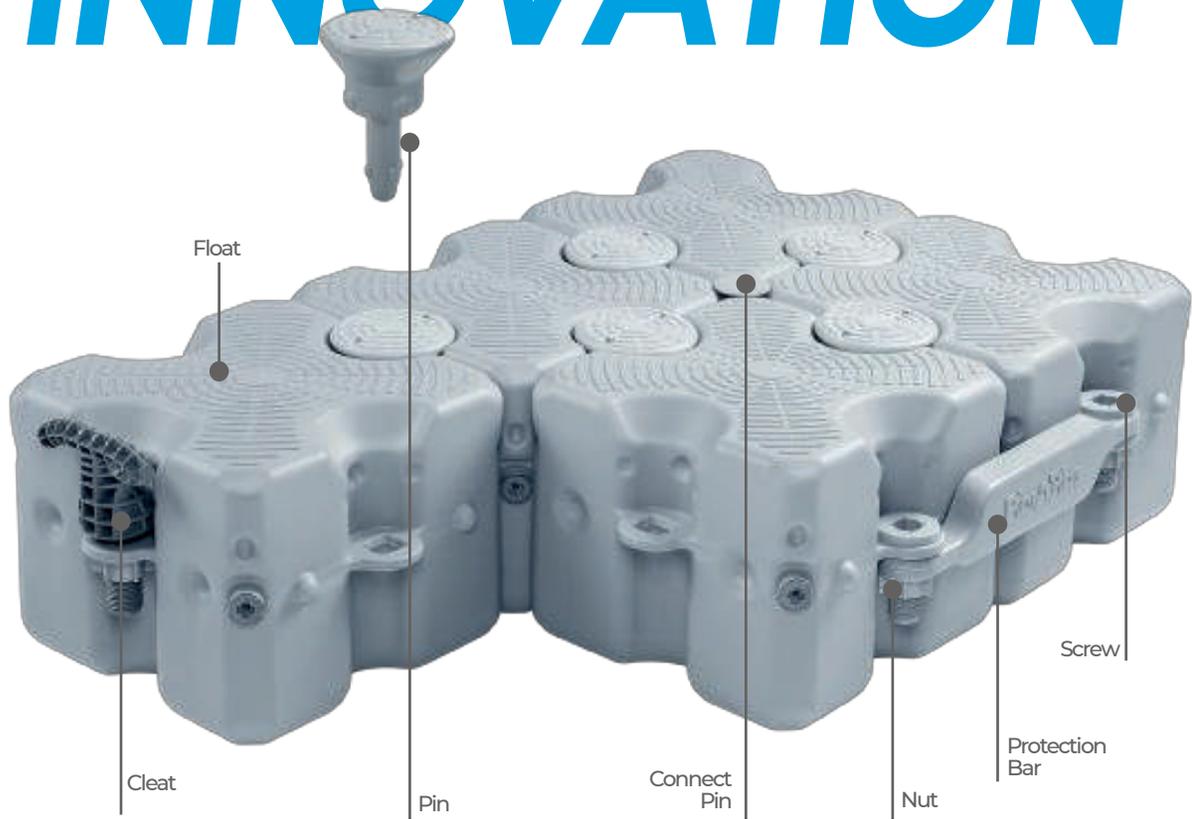

Your boat will be well accommodated in a dry or wet dock, your choice.

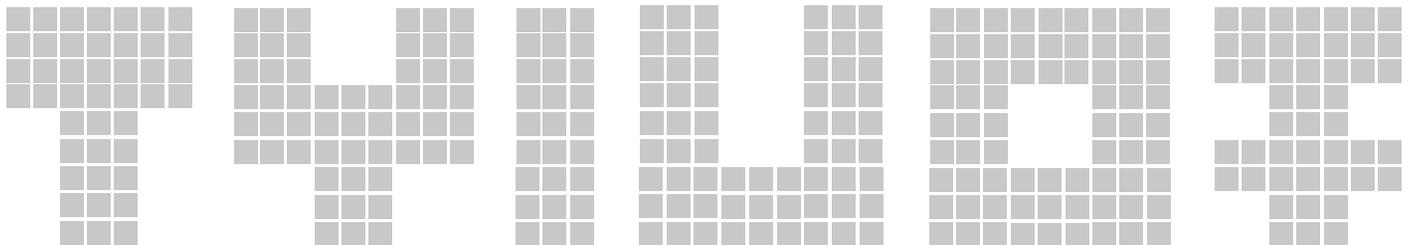

*Developed in Brazil. Now manufactured
in the United States as well.*

FLOATING INNOVATION

Top selling formats
