

# **PIERPLAS<sup>®</sup>**

*Floating Platforms*

[www.ntcfloat.com.br](http://www.ntcfloat.com.br)

## Pierplas is the floating solution that adapts to water levels, keeping your vessel safe and stable.

Ideal for residential projects, marinas, clubs, public works, and water-based services.

## Ecological

By choosing Pierplas, you put your social and environmental responsibility into action. Here's why:

- No need for tree cutting in production
- Clean manufacturing with no gas emissions
- No chemical products required for maintenance
- It can be reused through recycling
- Leaves no residues in the environment

## Exclusive

Build your platform in the size and shape you want. Include dry or wet docks. Discover the most popular configurations.

Share your idea with us. We'll develop a custom project just for you.

## Technology

Modular system with interlocking blocks and components that allow the assembly of custom platforms. Easy to move and transport.

## Quality

Made from High-Density Polyethylene, impact-resistant and with a lifespan of over 20 years. Includes antistatic and UV-resistant additives.

## Innovation

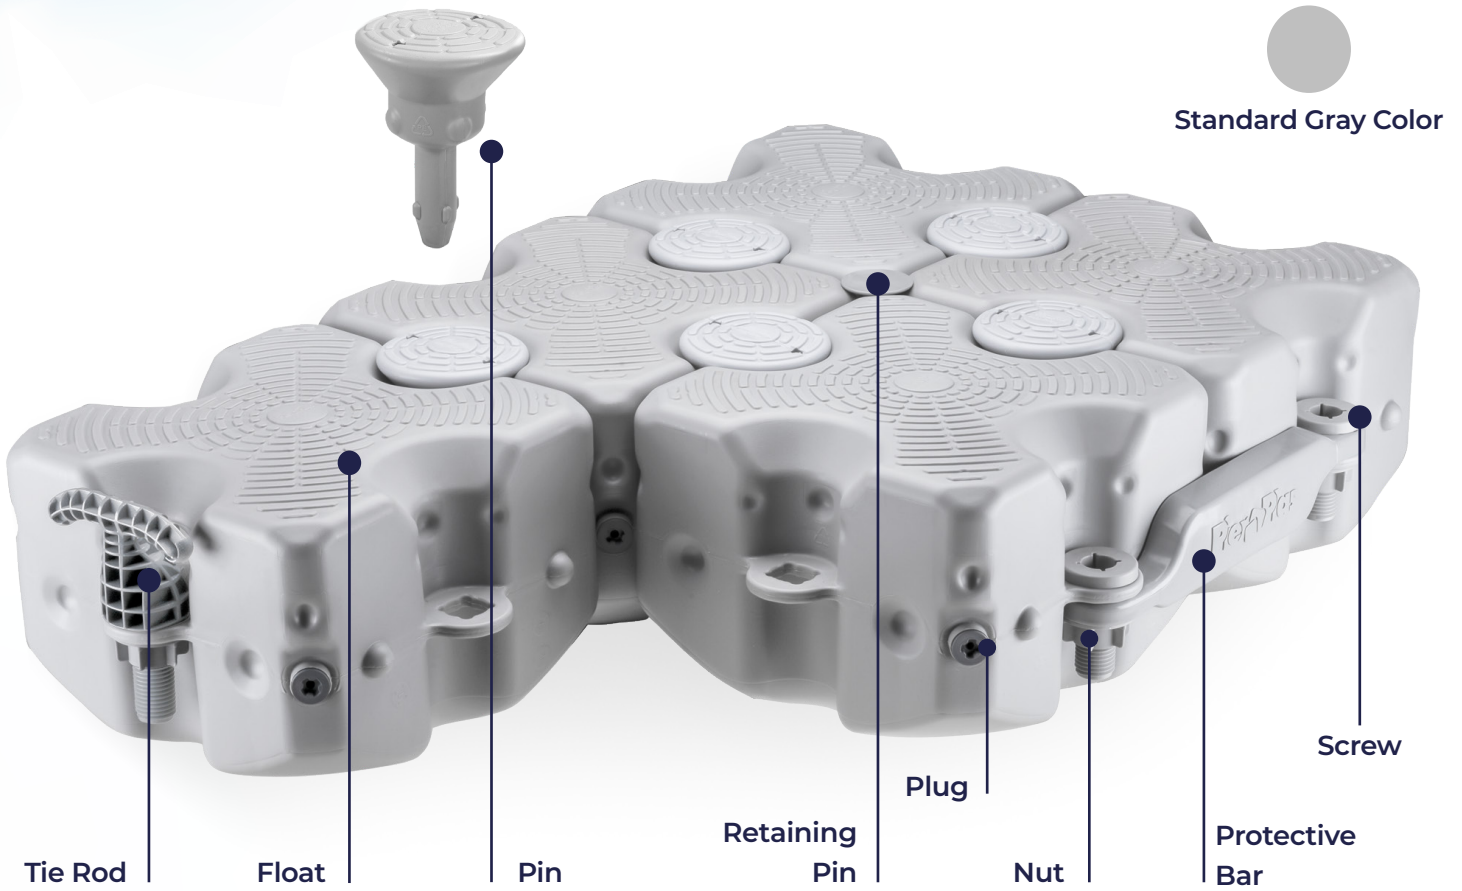

Quick and easy installation with a unique, innovative design. Delivers efficiency in comfort, safety, and stability on the water.

Developed in Brazil, with manufacturing in both Brazil and the United States.

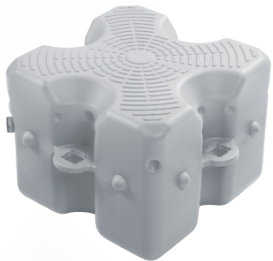

Charleston Harbor Resort & Marina, South Carolina, USA
